University of Sussex, Science and Technology Policy Research Unit – MSc in Energy Policy for Sustainability

The MSc in Energy Policy for Sustainability provides broad-based, interdisciplinary social science training for

University of Sussex
SPRU –
Science & Technology Policy Research

future energy policy professionals working in the public, private and third sectors. The MSc is led by the Sussex Energy Group, one of the largest energy policy research groups in the world and a core partner in the UK Energy Research Centre.

The MSc focuses on the opportunities, challenges and constraints associated with making the transition to sustainable energy systems in both the developed and developing world. It is unique in integrating ideas from economics, innovation and policy studies, while requiring no previous training in these areas.

University of Toronto, Centre for Environment – Certificate in GHG Accounting and Reporting

How do organisations determine the competency of staff and/or consultants engaged to compile GHG inventories? And how do they evaluate the credentials of GHG professional services?

A Certified GHG Professional who has earned a personnel certification developed through an impartial, independent and industry-supported process mitigates these concerns.

The University of Toronto, Centre for Environment's Certificate in GHG Quantification, leading to CSA Standards globally recognised professional GHG Inventory Quantifier Certification, will demonstrate your competence to develop, quantify, assess and report GHG inventories. No pre-requisite is required and you need not have an environmental background to take this course.
